CHALLENGES

641 zones

September 2023

December 2023

4 zones
> 100 ng/l

Surface water and groundwater

Analysis of soils

Analysis of the “living”

Biomonitoring

Biomonitoring programme in PFAS-affected areas

Finding volunteer candidates

Carrying out analyses with non-extensible technical capacities, and analytical methods

Expertise from a scientific committee
and an ethics committee

WHAT?

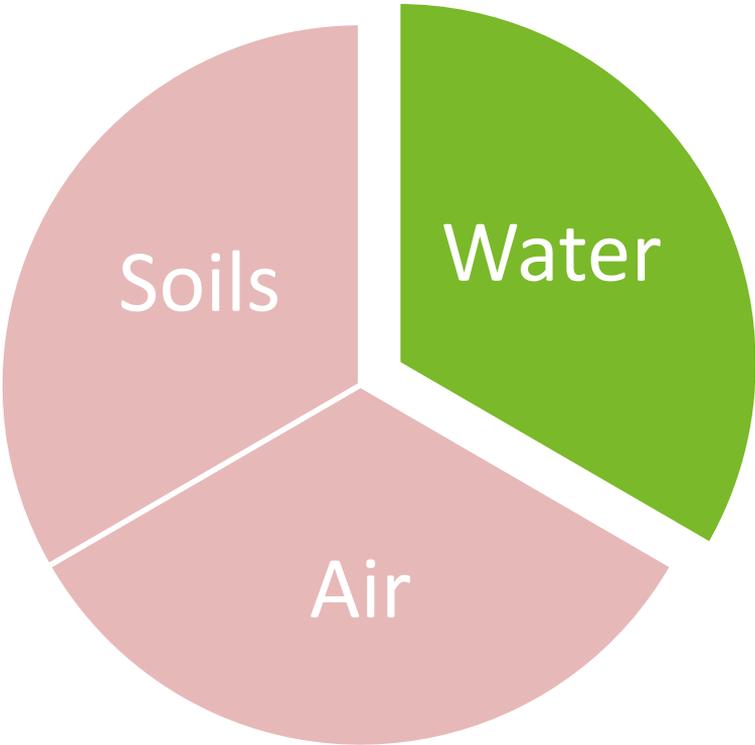

TO WHOM?

WHEN?

HOW?

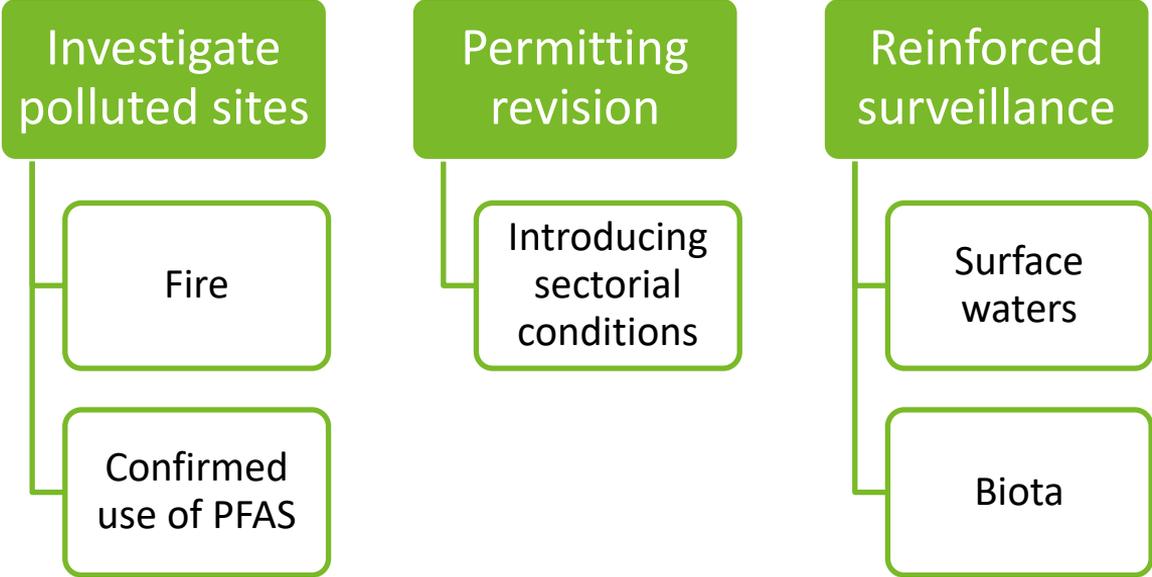

Norms

Benchmarking – European countries

Analyzes

Technical readiness

Ensuring labs have the technical abilities to analyze any new substances that might fall under future legal restrictions.

THANK YOU
FOR
YOUR ATTENTION
